Pat McGrady Named President of Insulfoam

(Carlisle, PA) – Carlisle Construction Materials (CCM), a leading manufacturer of commercial and residential construction products, proudly announces the promotion of Pat McGrady to President of Insulfoam, an operating division of CCM. In this new role, McGrady will be responsible for expanding Insulfoam's market share in the expanded polystyrene (EPS) marketplace, focusing primarily on the roofing, below-grade & below-slab insulation markets as well as geofoam applications.

McGrady brings extensive experience and industry knowledge to his new position. He has been an employee with CCM for more than 27 years, holding key positions in sales, marketing and technical and warranty services with Carlisle SynTec, Versico and EcoStar®. He is also a board member for the Roof Consultants Institute Foundation.

"EPS is a quality insulating material with an incredible potential for growth due to the continual rise in energy prices, and Pat's experience and strong people skills will enable him to successfully establish Insulfoam as the leader in its various markets," commented Carlisle Construction Materials President and CEO John Altmeyer. "This promotion will also strengthen Carlisle's position as the industry's leader in energy management solutions."

About Insulfoam:

As a division of Carlisle Construction Materials, Insulfoam continues to advance the building and construction industry by providing high-quality, dependable and long-lasting products that offer unmatched performance. They are the largest U.S. producer of block-molded EPS insulation, operating 11 manufacturing facilities across the country. For more information, call 800.248.5995 or visit www.insulfoam.com.
