Premier Building Systems Receives Award for Its Role in the Development of Senior Living Apartments

(Fife, WA) – Premier Building Systems, a leading manufacturer of Structural Insulated Panels (SIP), announces that its Southwest Regional Sales Manager, Jeff Beason, was recently awarded the “Outstanding Contribution To The Development of The Senator Richard Bryan Senior Apartments” award. Beason managed the entire project for Premier, which supplied six-inch SIP wall panels for 240 units and clubhouse of the newly constructed, Las Vegas-based senior-living apartment complex.

Presenting the award to Beason was Nevada’s U.S. Senator Richard Bryan, for whom the complex was named, Las Vegas Mayor Oscar B. Goodman, former Las Vegas Mayor Jan L. Jones, members of the City Council and the project’s developer Frank Hawkins. The award was presented at the complex’s grand opening ceremony held on July 16, 2007.

“We are so appreciative of Jeff and everyone at Premier. All of their hard work made this project so successful for everyone involved,” commented Hawkins. “We are firm believers in SIPs construction and we will definitely be using Premier’s SIP panels again on future projects.”

“It was an honor to be part of this wonderful project and while I was the one that was presented with the award, it never would have been possible without the hard work of everyone in this company,” commented Beason.”

About The Senator Richard Bryan Senior Apartments

Developed by Community Development Program Center of Nevada, the Richard Bryan Senior Apartments offer a combination of studio, one-bedroom and two-bedroom units for seniors 55 years old and older whose income is at or below 60% of the area’s median income.

About Premier Building Systems

As a division of Insulfoam, Premier Building Systems continues to lead the construction industry in the research, development and manufacturing of high-performance, energy-efficient building materials. Premier’s SIPs offer a stronger and greener cost-effective alternative to traditional

stick-frame construction, providing building owners with an opportunity to save up to 60% on their heating and cooling costs. Headquartered in Fife, WA, Premier operates manufacturing facilities in Fife and Phoenix, AZ. For more information call 800.275.7086 or visit www.pbssips.com.
